Introduction to Impact Bonds

October 2018

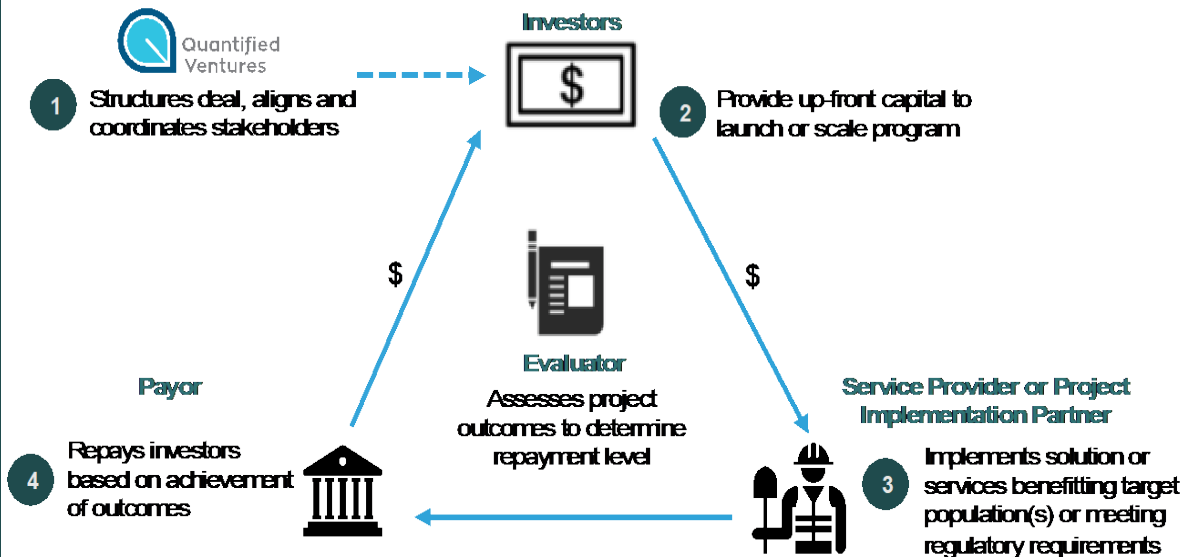

We need **innovative solutions** and **new ways to pay for them...**

We Design Catalytic Investments

- Pay for results, not process
- Accountability to outcomes
- Predictable evaluation
- Investor diversification and engagement

Environmental Impact Bond Model

Quantified Ventures Brings Impact Capital to Critical Projects

- Current focus areas:
 - Green infrastructure & resilience
 - Agriculture & water
 - Sustainable land use & conservation
 - Waste recovery
 - Energy and energy efficiency

Environmental Impact Bonds can help cities....

- **Align incentives** around outcomes
- **Transfer performance risk** of innovative projects
- **Access new sources of investment capital**
- **Showcase themselves and their projects**
- **Engage other stakeholders** benefitting from projects
- **Track and collect data** on outcomes
- **Build an evidence base** to inform future decisions
