Urban Waters Federal Partnership Objectives

# Urban Waters Federal Partnership: Los Angeles River Watershed

## Urban Waters Federal Partnership Objectives

Coordinating 15 federal agencies and a diverse group of partners, the Urban Waters Federal Partnership (UWFP) seeks to help communities restore and protect urban water quality and revitalize adjacent neighborhoods by engaging communities in activities that increase their connection to, understanding of, and stewardship of local urban waterways.

### UWFP Intended Outcomes:

- Connection to urban waters
- Understanding of urban waters and their potential
- Sense of public ownership of urban waters
- Protection and restoration of urban waters
- Community revitalization

## EPA Urban Waters Activities

This Urban Waters locations map indicates places where EPA and federal, state and/or local partners are collaborating. Locations are displayed in layers representing:

- EPA's Urban Waters Small Grants;
- Urban Waters Fellows supported by EPA, River Network and Groundwork USA; and
- Urban Waters Federal Partnership locations

Click on the points on the map to view region, organization, city, state and project description of the locations.

Vision Statement: One

## Urban Waters Federal Partnership: Los Angeles River Watershed

# Los Angeles Urban Waters Federal Partnership

Background: In 2011, John Kemmerer of the Environmental Protection Agency (EPA) Los Angeles convened a core group of Los Angeles River and Watershed leaders to explore how the federal government could better coordinate and expedite local projects aligned with the vision of restoring natural function to the River and increasing green infrastructure benefits throughout its watershed. What began as a conversation among a dozen participants has evolved into a forum for coordination, integration, and exchange of ideas among a diverse set of stakeholders ([EPA](#)).
